Re: Broadway Centre
Granite Contract

Dear Bruce,

As I clean up the loose ends of this Project I would be amiss if I did not congratulate Kepco and give my personal thanks for the job you performed. The success of this building is largely do to the image it portrays. The granite base is a key architectural element of that image. Kepco's ability to convert the metal panel system on the drawings to an excellent installation of granite panels is impossible to measure in dollars. We were advised that work could not be performed in the time frame allowed. You made it happen.

Thanks for your help and cooperation. I would welcome an opportunity to work together again on another project.

Sincerely,

Carl Tippetts
Project Manager
