To Whom It May Concern,

Please be advised that the company known as Kepco is considered by us to be one of the finest subcontractors we have worked with.

A few years back, Kepco provided granite faced panels as well as hand set granite for our Trevi Medical Office Building in San Diego, California.

This project was a four story building with a round corner granite facade and round columns. Kepco provided complete engineered shop drawings. Then they fabricated and installed/erected the prefabricated panels, which were constructed with metal stud framework and a granite face. They also installed several thousand square feet of hand set granite at the first floor entry and column areas.

Kepco's expertise during the design portion of the exterior cladding was invaluable in resolving problems while keeping the Architect's design in tact. Their attention to detail and professionalism during the construction phase of the job helped make this a first class project.

We would recommend Kepco to anyone, and hope we get to work with them again in the future.

Sincerely

CENTEX GOLDEN CONSTRUCTION
